Minutes of 2026-10-07 Meeting #568

1. Roll call [8:00]
   Meeting link
   Attendees:

   - [x] Sebastian Dobrzynski (SAP)
   - [x] John Gathogo (Microsoft)
   - [x] Ralf Handl (SAP)
   - [x] Hubert Heijkers (IBM)
   - [x] Ling Jin (IBM)
   - [x] Gerald Krause (SAP)
   - [x] Mike Pizzo (Microsoft)
   - [ ] Olga Podolyako (Microsoft)
   - [x] Heiko Theißen (SAP)

   Quorum is achieved (8 out of 9 voting members)

2. Approve agenda [8:05]

   Agenda is approved.

3. Approve minutes from previous meeting(s) [8:10]
   Minutes of 2026-09-30 Meeting #567

   Minutes are approved.

4. Progress OData V4.02 CSD02 and Vocabularies 4.0 CSD03 to CS01 [8:15]
   OData V4.02 CSD02 and Vocabularies 4.0 CSD03 comment resolution log #2281

   i. Mike makes the following motion:

   > I move we approve https://groups.oasis-open.org/higherlogic/ws/public/download/73558/OData%20V4.02%20CSD02%20and%20Vocabularies%204.0%20CSD03%20comment%20resolution%20log.pdf as the final resolution log for the public review of OData Version 4.02 Working Draft 2, OData JSON Format Version 4.02 Working Draft 02, OData Common Schema Definition Language (CSDL) XML Representation Version 4.02 Working Draft 02, OData Common Schema Definition Language (CSDL) JSON Representation Version 4.02 Working Draft 02, and OData Vocabularies Version 4.0 Working Draft 03, including the changes described there-in which are deemed by the Technical Committee to be entirely non-material.

   Heiko seconds. No objections, motion passes.

   ii. Heiko makes the following motion:

> I move to approve the Chair requesting that TC Administration hold a Special Majority Vote to approve "OData Version 4.02 CS01" contained in https://groups.oasis-open.org/higherlogic/ws/public/download/73570/odata-v4.02-cs01.zip as a Committee Specification. I further move that the TC affirm that changes have been made since the last public review, that the changes made are documented in https://groups.oasis-open.org/higherlogic/ws/public/download/73572/V4.02_CS01-diff.pdf and that the TC judges these changes to be Non-Material in accordance with the definition in the OASIS TC Process (http://www.oasis-open.org/policies-guidelines/tc-process#dNonmaterialChange).

Hubert seconds. TC holds a

> Tallied vote in support of motion: 8 yea, 0 nay, 0 abstain, 1 absence

The motion passes.

iii. Heiko makes the following motion:

> I move to approve the Chair requesting that TC Administration hold a Special Majority Vote to approve "OData Common Schema Definition Language (CSDL) JSON Representation Version 4.02 CS01" contained in https://groups.oasis-open.org/higherlogic/ws/public/download/73567/odata-csdl-json-v4.02-cs01.zip as a Committee Specification. I further move that the TC affirm that changes have been made since the last public review, that the changes made are documented in https://groups.oasis-open.org/higherlogic/ws/public/download/73572/V4.02_CS01-diff.pdf and that the TC judges these changes to be Non-Material in accordance with the definition in the OASIS TC Process (http://www.oasis-open.org/policies-guidelines/tc-process#dNonmaterialChange).

Hubert seconds. TC holds a

> Tallied vote in support of motion: 8 yea, 0 nay, 0 abstain, 1 absence

The motion passes.

iv. Heiko makes the following motion:

> I move to approve the Chair requesting that TC Administration hold a Special Majority Vote to approve "OData Common Schema Definition Language (CSDL) XML Representation Version 4.02 CS01" contained in https://groups.oasis-open.org/higherlogic/ws/public/download/73568/odata-csdl-xml-v4.02-cs01.zip as a Committee Specification. I further move that the TC affirm that changes have been made since the last public review, that the changes made are documented in https://groups.oasis-open.org/higherlogic/ws/public/download/73572/V4.02_CS01-diff.pdf and that the TC judges these changes to be Non-Material in accordance with the definition in the OASIS TC Process (http://www.oasis-open.org/policies-guidelines/tc-process#dNonmaterialChange).

Hubert seconds. TC holds a

> Tallied vote in support of motion: 8 yea, 0 nay, 0 abstain, 1 absence

The motion passes.

v. Heiko makes the following motion:

> I move to approve the Chair requesting that TC Administration hold a Special Majority Vote to approve "OData JSON Format Version 4.02 CS01" contained in https://groups.oasis-open.org/higherlogic/ws/public/download/73569/odata-json-format-v4.02-cs01.zip as a Committee Specification. I further move that the TC affirm that changes have been made since the last public review, that the changes made are documented in https://groups.oasis-open.org/higherlogic/ws/public/download/73572/V4.02_CS01-diff.pdf and that the TC judges these changes to be Non-Material in accordance with the definition in the OASIS TC Process (http://www.oasis-open.org/policies-guidelines/tc-process#dNonmaterialChange).

Hubert seconds. TC holds a

> Tallied vote in support of motion: 8 yea, 0 nay, 0 abstain, 1 absence

The motion passes.

vi. Heiko makes the following motion:

> I move to approve the Chair requesting that TC Administration hold a Special Majority Vote to approve "OData Vocabularies Version 4.0 CS01" contained in https://groups.oasis-open.org/higherlogic/ws/public/download/73571/odata-vocabularies-v4.0-cs01.zip as a Committee Specification. I further move that the TC affirm that changes have been made since the last public review, that the changes made are documented in https://groups.oasis-open.org/higherlogic/ws/public/download/73572/V4.02_CS01-diff.pdf and that the TC judges these changes to be Non-Material in accordance with the definition in the OASIS TC Process (http://www.oasis-open.org/policies-guidelines/tc-process#dNonmaterialChange).

Hubert seconds. TC holds a

> Tallied vote in support of motion: 8 yea, 0 nay, 0 abstain, 1 absence

The motion passes.

Heiko moves to merge PR **Feedback from V4.02 CSD02 review** #2275. Sebastian seconds. No objections, motion passes.

5. Compact JSON [9:00]
New specification document started with **Compact JSON Format** #2270

TC discusses the 15th issue listed in section 98: Control information in the positional representation. Hubert wants to include control information, for example, the `@type` in a hierarchy of entity types, in the positional representation, but the select-list of the context URL cannot contain the names used for control information. This is because these names are specific to the JSON format whereas the context URL is format-independent. In order to avoid that the Compact JSON spec changes the definition of the context URL in the core spec (and breaks Microsoft's context URL parser), two options are discussed:

- Compact JSON represents the control information not in the way specified in [OData-JSON, section 4.6] but in newly-defined instance annotations. These annotations can appear in the select-list.
- The positional property list is not derived from the select-list of the context URL, but specified in a new instance annotation on the same level where the context URL appears. A syntax for this new annotation must be found that avoids the need to repeat the property name lists that already occur in the select-list.

6. Issues [9:30]
   Issues - OData TC

   No further issues.

7. Next meetings [9:50]

   - Wednesday, October 14, 2026, during 8-10 PDT (17:00-19:00 CEST)
     Olga speaks about MCP
   - Wednesday, October 21, 2026, during 8-10 PDT (17:00-19:00 CEST) - Mike out
     Compact JSON
   - Wednesday, October 28, 2026, during 8-10 PDT (**16:00-18:00 CET**) - Gerald out
   - Wednesday, November 4, 2026, during 8-10 PT (17:00-19:00 CET)

8. AOB and wrap up [9:55]

   Meeting is adjourned.
   Find these minutes also at **Minutes of 2026-10-07 Meeting #568** #2295
